PROJECTS

Chatting WebApp

Made a web application, using Nodejs, Express, Socket IO and Mongodb database. Which can connect two or more users to a chatting room, media sharing is allowed

Webcam Streaming

Made a complete web-streaming platform using Python and Nodejs, which is capable of streaming live video from pc to Web using POST method.

ChatGPT integration on BASH

Wrote a BASH script program which connects computers to the latest Ai tool called ChatGPT.
It allows specific session of each use so ChatGPT can remember the last conversation as well.
